Banking

Support bank transformation while securing systems and satisfying customers.

To satisfy today's customers and compete against fintechs and digitally maturing competitors, banks realize they must transform their IT infrastructure, operating models and branches.

Speed processing by digitizing your customers' paper documents

Smart Document Capture for Banking streamlines your processes, significantly reduces branch exception handling and callbacks to the customer, and supports compliance.

The banker can even see which documents are required – and missing – in real time as they are processed. This expedites processes like new account openings and loan originations and frees up your staff to focus on their customers.

Reduce infrastructure and grow efficiency with cloud-based solutions

Whether it's at your HQ, individual branches or processing centers, look to the cloud for ways to rid yourself of clunky on-premises print and fax infrastructure and gain document workflow solutions that scale quickly and efficiently – all while maintaining tight security.

Automate back-office workflows and improve the customer experience

Streamline your back-office processes with smart document workflows that eliminate redundancy, reduce manual-handling errors, perform compliance verification checks, and improve communication within the bank – and with your customers.

Importantly, processing cycle times are shortened for a better customer experience.

Enable your bank's digital transformation with data and analytics

Using the power of the Internet of Things (IoT), Lexmark can capture and analyze printing, copying and scanning activity across the entire bank.

We turn that into action by helping you identify processing and workflow improvement opportunities that can reduce cost, prevent data breaches and shorten process cycle times.

Automate official check issuance and reduce costs with secure MICR check printing

Print official checks on plain paper at the teller line to reduce the time and cost of issuing a check, while mitigating the risk of check fraud and gaining an automated audit trail that integrates with your existing branch platform.

Minimize waste by printing securely on an as-needed basis with no preprinted stock required.

Robust reliability

Safeguard sensitive customer information with stronger data security

Lexmark builds security into everything we offer. For instance, secure pull printing with user-authentication limits access and keeps customer information safe.

Other security features help meet compliance and regulatory demands and prevent costly data breaches. Solutions such as Secure Document Monitor even scrutinize and flag document data for malicious and non-malicious insider security threats.
